The choice of provider is yours. This site is for informational purposes only. It is not a substitute for medical, behavioral health, dental, vision, or health care advice. This directory does not recommend a particular provider or type of behavioral health, medical, dental, vision or health care. If you believe you are experiencing a medical emergency, please call 911.

Before scheduling an appointment or receiving services, please check with the provider and your health plan to confirm that the provider is participating, that the service is covered, and the costs that you may be charged for the service. The directory is updated weekly. If you think any information in the directory is inaccurate, let us know by clicking on 'Report Incorrect Information' on that provider's page, or calling the number on your health plan member ID card.

Designated Diagnostic Provider (DDP) is a special designation provided to some categories of providers in certain states and funding types in recognition of their efficiency and quality. Some benefit plans or certificates of coverage will limit or reduce benefits if services are provided by in-network providers who are not also identified as a DDP. Please note, DDP is not applicable in all states and/or coverage options. If DDP is not applicable, the DDP designation or lack of designation will have no impact on your benefits. Please refer to your schedule of benefits to determine if DDP designation is applicable to your coverage. If DDP is applicable and you are having difficulty finding a DDP provider on this search tool or have other questions, you may contact us by calling the number on the back of your ID card.
